

Project Design Phase
Problem – Solution Fit Template

Date	30 September 2026
Team ID	
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

- 1. Customer Segment(s):** Employees requesting standard laptops, IT procurement team, approvers and the Hardware team.
- 2. Customer Constraints:** Limited IT staff time; the request must go through approval; hardware must be configured before it is handed over.
- 3. Available Solutions:** Manual creation and assignment of configuration tasks, emails and phone follow-ups, which are slow and error-prone.
- 4. Jobs-to-be-Done / Problems:** Get an approved standard laptop configured on time; avoid missed or delayed configuration tasks; reduce manual intervention.
- 5. Problem Root Cause:** The approval of a request and the creation of the configuration task are not connected by any automation.
- 6. Triggers:** A laptop request is placed and approved; a new laptop arrives and waits for configuration.
- 7. Emotions Before:** Frustration, uncertainty and impatience.
- 8. Emotions After:** Confidence, satisfaction and relief because the laptop is configured promptly.
- 9. Your Solution:** A Flow Designer flow ("Standard laptop task") triggered from the Service Catalog that creates a catalog task with the short description "Laptop need to Configured" and assigns it to the Hardware group; the flow is attached to the Standard Laptop catalog item.
- 10. Behaviour / Channels:** Online – users order through ServiceNow Service Catalog, approvers use the Approvers section, and the Hardware team works from the catalog task.
