

Project Design Phase-II

Data Flow Diagram & User Stories

Date	30 September 2026
Team ID	
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Data Flow – Standard Laptop Order Automation

External entities: Requester, Approver, Hardware team.

Processes: 1) Place order, 2) Approve request, 3) Run flow "Standard laptop task" and create catalog task, 4) Configure laptop.

Data stores: Request (sc_request), Requested Item (sc_req_item), Catalog Task (sc_task).

Data flow: Requester → (order details) → Place order → Request / Requested Item store → (approval request) → Approver → (approved) → Flow Designer flow → (new task with short description and Hardware group) → Catalog Task store → (task details) → Hardware team → (configuration status) → Requested Item.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Developer	Flow Creation	USN-1	As a developer, I can create a Flow Designer flow named "Standard laptop task" (Application: Global, Run as: System User) so that the procurement automation has a home.	Flow is created and saved with the given properties	High	Sprint-1
Developer	Flow Creation	USN-2	As a developer, I can add the Service Catalog trigger and the Create Catalog Task action (short description "Laptop need to Configured") so that a task is generated for every laptop request.	Trigger and action are added to the flow	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Developer	Flow Creation	USN-3	As a developer, I can set the Description, Assignment group (Hardware) and Approval (Approved) field values, then save and activate the flow.	Flow is active and creates tasks with the correct field values	High	Sprint-1
Administrator	Flow Assignment	USN-4	As an administrator, I can attach the "Standard laptop task" flow to the Standard Laptop catalog item (Maintain Items > Process Engine) so that the flow runs on each order.	Flow appears in the Process engine of the Standard Laptop item	High	Sprint-1
Requester (Employee)	Service Catalog	USN-5	As a requester, I can open Service Catalog > Hardware > Standard Laptop and click Order Now to place a laptop request.	Order is placed and a request number is shown	High	Sprint-2
Approver	Service Catalog	USN-6	As an approver, I can open the request record and approve the request from the Approvers section.	Request is approved and moves forward	High	Sprint-2
Hardware Team Member	Service Catalog	USN-7	As a hardware team member, I can see a catalog task under the Requested Item with the updated short description and the Hardware assignment group.	Catalog task has the correct short description and Hardware group	High	Sprint-2
Team Member	Documentation & Conclusion	USN-8	As a team, we can document the implementation, results and conclusion of the project.	Documentation is completed and submitted	Medium	Sprint-2
